Semarang, Central Java

An Applied Undergraduate in Electronic Engineering Technology from Politeknik Negeri Semarang with hands-on experience in electrical engineering, utility maintenance, industrial automation, and IoT development. Proven expertise in troubleshooting electrical systems, preventive and corrective machine maintenance, and integrating automation systems. Holds a formal certification in the Internet of Things (IoT) and thrives in high-pressure environments, working effectively both independently and within teams while remaining consistently focused on operational targets.

Work Experience

PT Purinusa Ekapersada - Kab.Semarang

Mar 2026 - Jun 2026

Internship Maintenance

- Perform preventive and corrective maintenance on electrical equipment and production machinery.
- Perform inspections and troubleshooting on control panels, electrical systems, and electric motors.
- implementing and prioritizing occupational health and safety
- Digitalization innovation for QR code-based electrical control panel wiring.

PT Laksana Bus Manufaktur - Kab.Semarang

Sep 2021 - Aug 2022

Operator Electric

- Install and test the interior and exterior electrical systems of bus units.
- implementing working drawings and work orders in the production process.
- perform repairs on rejected bus units.
- implementing and prioritizing occupational health and safety

Education

Politeknik Negeri Semarang - Kota Semarang

Sep 2022 - Sep 2026

Diploma in S.Tr Tekhnologi Rekayasa Elektronika, 3.38/4.00

- Thesis titled "IoT-Based Monitoring and Control System for Chrysanthemum Cultivation."
- IoT Competency Certification 2025
- Selected for the 2024 Student Entrepreneurship Funding Program (PMW) for the "Green Aerofarm" product.
- Selected for the 2023 Student Creativity Program (PKM-KC) for the "Health Neck Pillow" project.

SMK Nurul Barqi Semarang - Kota Semarang

Jun 2018 - Jun 2022

Senior High School, Mekatronika

- Participant in the UGM Mechanical Fair 2020 competition.
- Final project on MPS development

Organisational Experience

UKM Pengembangan Pengetahuan - Politeknik Negeri Semarang

Mar 2023 - Mar 2024

Staff Pendidikan dan Pelatihan

A student activity unit dedicated to enhancing skills and knowledge—specifically in robotics, scientific writing, and software proficiency—that supports academic studies or provides additional skill development.

- Illustrator software training coordinator.
- National-level infographic competition coordinator.
- Speaker for the religious study session.

Skills, Achievements & Other Experience

- **Projects** (2026): Thesis titled "IoT-Based Monitoring and Control System for Chrysanthemum Cultivation."
- **Projects** (2026): Digitization of control panel electrical schematics at PT Purinusa Ekapersada
- **Projects**  (2024): Selected for the 2024 Student Entrepreneurship Funding Program (PMW) for the "Green Aerofarm" product.
- **Projects**  (2023): Selected for the 2023 Student Creativity Program (PKM-KC) for the "Health Neck Pillow" project.
- **Internship**  (2022): PT Laksana Bus Manufaktur

- **Internship** 📍: PT Purinusa Ekapersada
- **Webinars Attended** 📍 (2023): Diponegoro Economics Sosial General Discussion 2023
- **Webinars Attended** 📍 (2021): Matching Fund 2021
- **Hard Skills** 📍: Designing software and applications
